Introduction

This catalogue presents profiles of educational institutions in the Chernihiv Region, highlighting their capacity, areas of specialisation, and opportunities for partnership and development.

It is designed to provide international partners, donors, development organisations, and other stakeholders with a structured overview of the region's education ecosystem and its role in supporting recovery, workforce development, and long-term resilience.

The catalogue reflects the diversity of institutions, including universities, professional pre-higher education institutions, and vocational education providers. These institutions ensure practice-oriented learning, respond to labour market needs, and contribute to the development of key sectors such as engineering, agriculture, healthcare, education, transport, and services.

Despite the challenges caused by the war, educational institutions in the region continue to operate and adapt. They ensure continuity of the educational process through blended and digital formats, maintain safe learning environments, and actively modernise infrastructure and teaching approaches.

A strong emphasis is placed on cooperation with employers, development of practical skills, and alignment with European education standards. Institutions are also actively engaged in international cooperation and open to partnerships in education, research, innovation, and capacity building.

By bringing together institutional capacity and partnership opportunities, the catalogue serves as a practical tool for fostering cooperation, supporting recovery, and strengthening human capital in the Chernihiv Region.

CHERNIHIV HIGHER VOCATIONAL SCHOOL OF SERVICES

Municipal Educational Institution of the Chernihiv Regional Council
Vocational Education and Training Institution

ABOUT US

For more than fifty years, the institution has been training skilled professionals for the garment industry and service sector in the city of Chernihiv.

This is the only vocational education institution in the Chernihiv region that provides training in the professions of seamstress, tailor, cutter, hairdresser (hair stylist), and makeup artist, from entry-level qualifications to advanced professional levels.

The institution also offers Professional Junior Bachelor programmes in related fields, including Light Industry Technologies and Beauty Services.

Safe learning environment

Educational process during wartime:

Blended learning format (primarily offline).

Year of Establishment:
1972

Teaching staff:
64

Total number of students:
565

Academic and other staff:
36

TRAINING AND PRACTICAL CENTRES

The institution hosts two training and practical centres:

- Training and Practical Centre for Modern Garment Technologies and Design
- Training and Practical Centre for Hairdressing and Decorative Cosmetics

PARTNERSHIP WITH EMPLOYERS

The institution maintains strong partnerships with a wide network of employers, ensuring close cooperation in training, internships, and practical learning. These partnerships help align educational programmes with the needs of the labour market.

FACILITIES AND ACHIEVEMENTS

The institution has a well-developed training infrastructure. Students regularly win prizes in national professional skills competitions for vocational education students, including:

- Ukrainian Competition of Young Fashion Designers “Fashion Breakthrough of the Light Industry”
- Prize winners of annual national competitions in the profession “Hairdresser-Stylist.”

PRIORITY AREAS OF INTERNATIONAL COOPERATION

- International educational exchanges for students and teachers
- Joint educational, research, and innovation projects
- Professional development for teaching staff
- Digital transformation of the educational process
- Participation in international grant and donor programmes
- Cooperation with universities, training centres, and employers

SNOVSK LYCEUM №1

Snovsk City Council, Koriukivka District,
Chernihiv Region

Lyceum with structural units: Primary School and Gymnasium

ABOUT US

Snovsk Lyceum №1 is the largest and the main (hub) educational institution of the local community. The school provides a safe and supportive learning environment and continuously develops in response to the evolving needs of modern society. The foundation of the lyceum's success is the strong collaboration between administration, teachers, staff, parents, and students. The lyceum operates as a collaborative learning community, where everyone works together towards shared educational goals. Lyceum №1 is committed to providing high-quality education and comprehensive student development.

Safety infrastructure: The lyceum has a protective shelter for 200 people, and a new shelter for 300 people is currently under construction, strengthening the safety of the educational environment.

Year of Establishment:
1805

Academic staff:
53

Total number of students:
573

Administrative and support staff:
29

ACHIEVEMENTS AND DEVELOPMENT

Over the past two years, students of the lyceum participated in establishing three national records of Ukraine.

According to the decision of the Chernihiv Regional Council (September 17, 2024) on the formation of the regional network of secondary education institutions, Snovsk Lyceum №1 has been designated as the only institution in the Snovsk territorial community that will provide complete general secondary education starting from September 1, 2027.

INTERNATIONAL COOPERATION

Priority areas include:

- international educational exchanges for students and teachers
- joint educational, research, and innovation projects
- development of STEM education
- digital transformation of the learning process
- development of vocational and inclusive education
- participation in international grant and donor programmes.

MYKOLA HOHOL NIZHYN STATE UNIVERSITY

Higher Education Institution

ABOUT US

Mykola Hohol Nizhyn State University is a university with deep academic traditions that combines a wide range of modern study programmes, international partnerships, innovative teaching approaches, and strong support for academic mobility.

The university is steadily developing as an educational and research centre that prepares competitive professionals across various fields of knowledge. It offers a broad range of Bachelor's, Master's, and PhD programmes in the humanities, social sciences, natural sciences, and technical disciplines.

The university provides four radiation-protection shelters and three additional protective shelters with a total capacity of 1,207 people, ensuring the continuity of the educational process.

Year of
Establishment:
1805

Academic staff:
154

Total number
of students:
2,000

Administrative and
support staff:
223

INTERNATIONAL COOPERATION

- Development of academic mobility programmes, short- and long-term exchanges, summer and winter schools, joint study modules for students, and training opportunities for academic staff.
- Implementation of interdisciplinary projects in education, humanities, IT, natural sciences, psychology, and social work, using the university's research and project potential.
- Development and delivery of professional development programmes, micro-credentials, and certificate courses in teaching methodology, inclusive education, digital skills, and academic integrity.
- Cooperation in the implementation of digital learning platforms, blended and online learning models, electronic educational resources, and digital assessment tools.
- Partnerships for the preparation and implementation of projects within Erasmus+, Horizon Europe, DAAD, British Council, USAID, and other international initiatives supporting education, research, and institutional development.

INTERNATIONAL COOPERATION

The university cooperates with educational and research institutions in more than 30 countries across four continents and implements projects aimed at:

- developing inclusive education at regional and international levels
- joint academic and research initiatives with international universities
- educational conferences and training programmes for teachers and students
- cooperation with local and international organisations to strengthen academic integration.

MARIIA ZANKOVETSKA NIZHYN PROFESSIONAL COLLEGE OF CULTURE AND ARTS

Municipal Institution of the Chernihiv
Regional Council College

ABOUT US

The Mariia Zankovetska Nizhyn Professional College of Culture and Arts is an educational centre dedicated to training specialists for the creative and cultural industries.

The college offers multidisciplinary programmes, which makes it unique among regional institutions. Its main fields of study include:

- Choreography
- Fine and Decorative Arts
- Management of Socio-Cultural Activities
- Information, Library and Archival Studies

Founder: Department of Culture and Tourism, Nationalities and Religions of the Chernihiv Regional State Administration

Safety infrastructure

The college operates two radiation-protection shelters and one additional protective shelter. All shelters are fully equipped and comply with national emergency safety standards, as confirmed by official inspections.

Total number
of students:
250

Year of
Establishment:
1999

Academic
staff:
133

EDUCATIONAL APPROACH

Modern learning technologies

The college actively adapts to contemporary challenges by implementing Google Classroom and cloud-based technologies that support both synchronous and asynchronous learning. This ensures the continuity of the educational process even in challenging circumstances.

The institution also supports students with special educational needs through personalised learning pathways.

STUDENT ACHIEVEMENTS AND COMMUNITY ENGAGEMENT

Students regularly win awards in national and international competitions, festivals, exhibitions, and artistic contests.

Many graduates successfully pursue careers in professional artistic ensembles and cultural institutions.

The college also cooperates closely with local communities through cultural initiatives, festivals, and artistic events. Students actively participate in community-based activities, including volunteer projects and cultural programmes.

VISION AND MISSION

The college aims to become a leading centre of arts education in the region, shaping a creative generation capable of integrating the Ukrainian cultural heritage into the global cultural context.

The institution functions as an open educational ecosystem that promotes academic freedom while using modern technologies to enhance the creative potential of every student.

DEVELOPMENT AND INTERNATIONAL COOPERATION

Priority areas include:

- international educational exchanges for students and teachers
- digital transformation of the educational process
- partnerships with universities and employers
- participation in international grant and donor programmes

NOVHOROD-SIVERSKYI PROFESSIONAL MEDICAL COLLEGE

Municipal Institution of the Chernihiv Regional Council

ABOUT US

Novhorod-Siverskyi Professional Medical College was established in 1936 by decision of the Chernihiv Regional Health Authority as a feldsher-midwife school.

On 22 May 2020, by decision of the Chernihiv Regional Council, the institution was officially renamed :

Novhorod-Siverskyi Professional Medical College.

The college provides professional pre-higher education and trains healthcare specialists at the level of Professional Junior Bachelor. Programmes are delivered in the field of Healthcare and Social Welfare, specialising in Nursing, with educational tracks in General Medicine and Nursing Care. The college places strong emphasis on practice-based learning, enabling students to complete a significant part of their training in healthcare institutions and clinical settings.

Governing authority: Department of Healthcare, Chernihiv Regional Council

Safety and security infrastructure:

The college is equipped with two radiation-protection shelters and two basic protective shelters. The campus maintains a secure environment, established safety protocols during air-raid alerts, and access to psychological support services.

VISION AND MISSION

The college aims to develop as an innovation-driven educational hub that provides competitive lifelong learning opportunities in healthcare education.

Its mission is to train a new generation of mid-level medical professionals - nurses and feldshers - combining clinical competence, digital literacy, and patient-centred care. Long-term vision includes the development of a simulation-based training centre and expansion as a regional platform for applied medical education.

DEVELOPMENT AND INTERNATIONAL COOPERATION

Priority areas include:

- joint educational and research initiatives
- professional development of academic staff
- digital transformation of learning
- participation in international grant programmes
- cooperation with universities, training centres, and employers

STRATEGIC PRIORITIES

- Quality of education and patient safety.
- Innovation and digital healthcare.
- International mobility. Joint training programmes and internships with EU healthcare institutions.
- Practice-oriented learning model.
- Student-centred education and quality assurance

SOKYRYN AGRARIAN VOCATIONAL LYCEUM

Chernihiv Region Vocational Education Institution

ABOUT US

Sokyrin Agrarian Vocational Lyceum offers individual learning pathways tailored to students' needs through the implementation of:

- Author-designed programmes, such as “Kernel – Chance for Youth”
- Specialised vocational training with enhanced theoretical and practical preparation in the following professions:

- Farm Worker
- Chemical and Bacteriological Analysis Laboratory Assistant / Horticulture Specialist
- Agricultural Machinery Operator / Motor Vehicle Driver Safety and continuity of education

The lyceum ensures the continuity of the educational process during wartime through flexible learning arrangements, including in-person, distance, and blended formats. The lyceum also provides certificate programmes that allow students to obtain additional qualifications alongside their main diploma, such as the profession of Tour Guide.

The institution is equipped with two radiation-protection shelters, allowing classes to continue safely during air raid alerts.

Year of Establishment:
1972

Academic staff:
23

Total number of students:
201

Administrative and support staff:
41

INFRASTRUCTURE AND LEARNING RESOURCES

Sokyrin Agrarian Vocational Lyceum functions as an innovation hub for vocational education, offering:

- modern laboratories equipped with specialised equipment
- its own training farm with 92.5 hectares of arable land and 70 head of cattle
- robotics and 3D printing technologies
- dedicated learning hubs and student workspaces

The lyceum provides spaces for independent study, creative development, and meaningful student activities.

OPENNESS AND PARTNERSHIP

The lyceum actively promotes:

- cooperation with businesses and employers in developing practical training programmes
- openness to the community, transforming the lyceum into a regional cultural and educational hub

The institution seeks partnerships that strengthen its practice-oriented training and educational infrastructure, including:

- international educational exchanges for students and teachers
- joint educational, research, and innovation projects in the agricultural sector
- participation in international grant and donor programmes for modernising facilities and equipment.

INSTITUTIONAL VISION

Sokyrin Agrarian Vocational Lyceum combines strong educational traditions with innovative approaches, preparing competitive graduates capable of responding to the challenges of the modern world.

KOZELETS PROFESSIONAL COLLEGE OF VETERINARY MEDICINE

Professional Pre-Higher Education Institution

STRATEGIC VISION

The College was established in 1925 as an agricultural vocational school and later developed into an agrozootechnical institution.

Today, it is the only institution in the Chernihiv region providing training in Veterinary Medicine (specialty 211 / N6).

Founder: Ministry of Education and Science of Ukraine

The College has a protective shelter located in the main building.

Year of
Establishment:
1925

Academic staff:
18

Total number
of students:
175

Administrative and
support staff:
47

KEY FEATURES AND ACHIEVEMENTS

The educational process is delivered across three academic buildings, including a central kopnyc, a morphology building, and veterinary clinics and laboratories equipped with agricultural animals for practical training.

Students benefit from a practice-oriented learning environment supported by qualified teaching staff.

STRATEGIC VISION AND DEVELOPMENT PRIORITIES

The College aims to develop a competitive and innovation-driven educational environment ensuring high-quality training of specialists. Strategic goals include improving education quality through the modernisation of educational programmes, implementation of advanced pedagogical and digital technologies, and development of an open, inclusive, and partnership-based institutional culture. Key priorities include student-centred learning and continuous professional development of teaching staff.

DEVELOPMENT AND INTERNATIONAL COOPERATION

- Participation in international grant and donor-funded programmes
- Professional development of teaching staff
- Cooperation with Bila Tserkva National Agrarian University, training centres, and employers

CHERNIHIV PROFESSIONAL COLLEGE OF ENGINEERING AND DESIGN

Professional Pre-Higher Education Institution

Separate Structural Unit of Kyiv National University
of Technologies and Design

ABOUT US

The College provides professional pre-higher education in engineering, design, and applied technical fields, aligned with labour market needs and regional development priorities.

Educational programmes include:

- Industrial Engineering (Sectoral Mechanical Engineering)
- Design
- Accounting and Taxation
- Automation, Computer-Integrated Technologies and Robotics
- Electrical Power Engineering, Electrical Engineering and Electromechanics

Founder: Ministry of Education and Science of Ukraine

Year of
Establishment:
1962

Academic staff:
37

Total number
of students:
401

Administrative and
support staff:
32

STRATEGIC VISION AND DEVELOPMENT PRIORITIES

The College aims to strengthen its capacity as a modern educational institution by developing innovative learning environments and expanding practice-oriented training.

Key priorities include the establishment of:

- VR laboratories for installation and maintenance of electrical equipment
- A laboratory for alternative energy technologies
- A modern design studio

INTERNATIONAL COOPERATION AND DEVELOPMENT

The College is open to international cooperation and interested in:

- Participation in international grant and donor-funded programmes
- Joint educational, research, and innovation projects
- International educational exchanges for students and teaching staff

OSTER PROFESSIONAL COLLEGE OF CONSTRUCTION AND DESIGN

Professional Pre-Higher Education Institution

INFRASTRUCTURE AND DIGITAL LEARNING

Founder: Ministry of Education and Science of Ukraine / Department of Education and Science of Chernihiv Regional State Administration
The College has a basic protective shelter.

The College uses the LMS Moodle platform to support distance learning.

The educational process integrates modern architectural, design, and engineering software, including:

- ArchiCAD (Building Information Modelling – BIM, GRAPHISOFT)
- Artlantis Studio and Enscape (3D visualisation and rendering tools)
- Adobe Photoshop and Canva (graphic design tools)
- 3D Home Architect Design Suite Deluxe (landscape design)
- AVK-5 (cost estimation and economic calculations)

In construction physics courses, both professional engineering software (Audytor OZC) and online tools such as SmartCalc are used, aligned with current national building standards.

 Year of Establishment:
1904

 Total number of students:
232

 Academic staff:
104

STRATEGIC VISION

The College aims to train highly qualified specialists in music who meet the needs of the cultural and educational environment of the Chernihiv region. Graduates are equipped with modern professional competencies and prepared for continuous professional development and effective work in teaching, performing, and cultural-educational activities.

PRIORITY AREAS OF INTERNATIONAL COOPERATION

- Educational exchanges for students and teaching staff
- Joint educational, research, and innovation projects
- Professional development of teaching staff
- Participation in international grant and donor-funded programmes
- Cooperation with universities, training centres, and employers

Professional Pre-Higher Education Institution NIZHYN PROFESSIONAL MEDICAL COLLEGE

Municipal Institution of the Chernihiv Regional Council

ABOUT US

Founder: Chernihiv Regional Council

Supervising authority: Department of Healthcare of Chernihiv Regional State Administration

The College ensures a safe learning environment and continuity of education during wartime, including the use of a properly equipped shelter. The educational process is organised in a blended format in compliance with safety requirements.

Year of
Establishment:
1907

Administrative and
academic staff
61

Total number
of students:
394

STRATEGIC VISION AND DEVELOPMENT PRIORITIES

The College aims to develop as an innovative educational hub for training competitive healthcare professionals in line with European quality standards.

Key priorities include digitalisation of the educational process, development of simulation-based training infrastructure, expansion of international partnerships, and participation in donor-funded projects. The institution operates based on the principles of sustainable development, academic freedom, and openness to innovation, preparing graduates to meet the challenges of modern healthcare systems.

DEVELOPMENT AND INTERNATIONAL COOPERATION

- Academic mobility for students and internships for teaching staff in European healthcare institutions
- Participation in international and grant programmes (including Erasmus+) to develop simulation medicine and training infrastructure
- Digital transformation of medical education, including the use of VR technologies and STEM approaches
- Cooperation in rehabilitation, mental health, and tactical medicine aligned with NATO (TCCC) standards
- Professional development of staff, inclusive education, and psychological rehabilitation initiatives
- Strategic partnerships with international educational institutions and employers to align programmes with global labour market requirements

PROFESSIONAL COLLEGE OF TRANSPORT AND COMPUTER TECHNOLOGIES

Separate Structural Unit of Chernihiv Polytechnic
National University
Professional Pre-Higher Education Institution

ABOUT US

The college provides training for qualified specialists in the transport, mechanical engineering, and information technology sectors, combining traditions of applied education with modern learning approaches.

Educational programmes are strongly practice-oriented and developed in line with current labour market needs at regional, national, and international levels.

Safety and continuity of education

The college is equipped with a basic protective shelter with a capacity of 300 persons.

Founder: Ministry of Education and Science of Ukraine

Year of
Establishment:
1967

Academic staff:
57

Total number
of students:
1,017

Administrative and
support staff:
26

VISION AND MISSION

The college aims to transform into a flexible and innovation-driven centre of professional pre-higher education capable of responding to the challenges of wartime and post-war recovery in Ukraine. Long-term priorities include systematic improvement of education quality, development of labour-market-relevant programmes, expansion of digital and technical infrastructure, and strengthening institutional capacity to participate in international and European educational initiatives.

The institution promotes sustainable development principles, practice-oriented and dual learning models, human capital development, and the creation of an open educational environment integrated into the European education area and national recovery processes.

DEVELOPMENT AND INTERNATIONAL COOPERATION

Priority areas include:

- international mobility programmes for students and teaching staff
- joint educational and innovation projects
- professional development initiatives for educators
- digital transformation of the educational process
- development of STEM, vocational, and inclusive education
- participation in international grant and donor programmes
- cooperation with universities, training centres, and employers

CHERNIHIV PROFESSIONAL LYCEUM OF RAILWAY TRANSPORT

Vocational Education Institution

ABOUT US

Chernihiv Professional Lyceum of Railway Transport provides training for skilled workers in the transport sector and related areas of the regional economy.

Educational programmes are aligned with labour market needs, taking into account employer demands and incorporating elements of dual education. The institution systematically updates the content of training in transport and technical professions, combining theoretical learning with practical training at partner enterprises.

Founder: Chernihiv Regional Council

The Lyceum ensures continuity of the educational process under martial law conditions, with one temporary shelter and a partially equipped bomb shelter available.

Year of Establishment:
1992

Academic staff:
70

Total number of students:
532

Administrative and support staff:
45

INFRASTRUCTURE AND LEARNING ENVIRONMENT

The Lyceum operates a Training and Practical Centre for Electrical Installation Technologies and Renewable Energy, enabling students to learn using modern equipment and digital tools. Cooperation with enterprises in Chernihiv and the region, local authorities, civil society organisations, and businesses contributes to high graduate employability and sustainable institutional development.

STRATEGIC VISION AND MISSION

The Lyceum aims to develop as a modern regional centre for vocational education, providing high-quality, practice-oriented training for competitive specialists aligned with labour market needs and European education standards. Key priorities include modernising the learning environment and infrastructure, expanding dual education models, implementing digital and STEM solutions, developing training and practical centres, strengthening partnerships with business and communities, and active participation in international programmes to support integration into the European vocational education space and sustainable development.

INTERNATIONAL COOPERATION AND DEVELOPMENT

- Joint educational, innovation, and applied projects in transport technologies, electrical installation, and renewable energy
- Digital transformation of the educational process, including modern digital platforms, simulation equipment, and blended learning approaches
- Development of STEM, vocational, and inclusive education aligned with regional labour market needs and sustainability principles
- Participation in international grant programmes supporting infrastructure modernisation and centres of excellence
- Expanded cooperation with universities, training centres, employers, and sectoral organisations to ensure lifelong learning pathways and graduate employment

BOBROVYTSIA PROFESSIONAL COLLEGE

named after O. Mainova

Structural Unit of the National University of Life
and Environmental Sciences of Ukraine

ACHIEVEMENTS AND EDUCATIONAL APPROACH

Between 2019 and 2023, the College participated in a national pilot project on the implementation of dual education in professional pre-higher education institutions and continues to systematically integrate dual learning elements into its programmes.

Since 2024, the College has developed international cooperation with German partners within the FABU project, enabling student internships in Germany and the integration of European educational practices.

The educational process is organised in close cooperation with employers, with practical training conducted at 12 partner enterprises and organisations in the region.

The College has two shelters and ensures continuity of the educational process depending on the security situation, operating in in-person or remote formats as required.

Year of
Establishment:
1891

Administrative and
academic staff
88

Total number
of students:
487

STRATEGIC VISION AND MISSION

The College positions itself as a leading innovative centre that combines strong agricultural traditions with modern digital and management practices to train competitive specialists in the context of Ukraine's post-war recovery.

Strategic objectives focus on ensuring high-quality education through the introduction of innovative technologies, including AI and dual learning models, developing a modern, environmentally responsible, and safe educational environment, and strengthening integration into the European education area through partnerships with international organisations and the National University of Life and Environmental Sciences of Ukraine.

Key institutional priorities include sustainable development, academic integrity, and stakeholder engagement, enabling the College to function as a platform for strategic cooperation between education, business, and local communities.

INTERNATIONAL COOPERATION AND DEVELOPMENT

- International educational exchanges for students and academic staff
- Joint educational, research, and innovation projects
- Professional development of teaching staff
- Digital transformation of the educational process
- Participation in international grant and donor programmes
- Cooperation with universities, training centres, and employers

CHERNIHIV PROFESSIONAL CONSTRUCTION LYCEUM

Vocational Education Institution

ABOUT US

Chernihiv Professional Construction Lyceum provides initial vocational training, retraining, and upskilling for specialists in the construction sector.

Founder: Chernihiv Regional Council / Department of Education and Science of Chernihiv Regional State Administration

The institution has a shelter and delivers education in a blended format. First-year students study in-person, while second- and third-year students combine remote theoretical training with in-person practical training.

Year of
Establishment:
1986

Total number
of students:
604

Academic and
administrative staff:
116

INFRASTRUCTURE AND EDUCATIONAL CAPACITY

The Lyceum operates three regional training and practical centres where adult learners can obtain partial qualifications through short-term courses using modern equipment and materials:

- Construction Training Centre (Ceresit-based technologies)
- Masonry Training Centre
- Furniture Technologies Training Centre

Dual education is implemented in the training of electric and gas welders. The institution participates in international and national projects, including energy efficiency initiatives supported by GIZ, InterUAction4Labour, BuildBackBio, and resilience-focused programmes.

STRATEGIC VISION AND DEVELOPMENT PRIORITIES

The Lyceum aims to transform into a modern Centre of Vocational Excellence, contributing to workforce development for Ukraine's post-war reconstruction and promoting innovative construction technologies.

Key strategic directions include:

- Alignment with labour market needs through cooperation with industry partners
- Technological modernisation, including renovation of workshops and development of training centres
- Strengthening financial sustainability through partnerships and service provision
- Increasing the attractiveness of construction professions among young people

DEVELOPMENT AND PARTNERSHIP PRIORITIES

- Practice-oriented learning with up to 70% of training conducted through real-site практика experience
- Energy efficiency and green construction technologies
- Digitalisation, including the integration of Building Information Modelling (BIM) into training
- Development of reskilling programmes for veterans and adult learners

The Lyceum is open to partnerships with businesses and international organisations to modernise vocational education.

Key areas of cooperation include:

- Upgrading infrastructure and equipment
- Development of modern training programmes
- Career guidance and graduate employment
- International cooperation and exchange of best practices

Informer

The International Renaissance Foundation is one of the largest charitable foundations in Ukraine. Since 1990 we have been helping to develop an open society based on democratic values in Ukraine. During its activity, the Foundation has supported more than 20 thousand projects. The funding amounted to over \$ 350 million.

Website: www.irf.ua

Facebook: <https://www.fb.com/irf.ukraine>

East Europe Foundation is a non-profit charitable organization. The Foundation is one of the leaders in Ukraine's civil society sector, having completed more than 100 programs of various scales, duration, and complexity. Its areas of activity include the development of democracy and civil society, humanitarian response and recovery, instituting e-government, and much more. The Foundation's mission is the transformation of Ukraine into a country that serves and protects its people.

The Norwegian Agency for Development Cooperation (Norad) is a key governmental body responsible for implementing Norway's international development policy. Working closely with global partners, Norad strives for a greener and more equitable world where human rights are respected and no one is left behind. Acting on behalf of Norway, Norad manages grants for long-term development and humanitarian aid, and provides expert advice to the Norwegian Ministry of Foreign Affairs and the Ministry of Climate and Environment. Through knowledge and cooperation, Norad ensures that Norwegian aid makes a real impact on global development.

Website: www.norad.no

Facebook: www.facebook.com/Norad

Sweden invests public resources in international development efforts aimed at improving living conditions for people facing poverty and oppression worldwide. Sweden has been cooperating with Ukraine since 1998, supporting independent media, civil society, environmental protection, and social reforms. Today, its long-term support also includes infrastructure rebuilding and economic recovery, alongside humanitarian assistance for those affected by the war. These activities are supported by Sweden, through the Swedish International Development Cooperation Agency (Sida).

Website: www.sida.se

Facebook: www.facebook.com/SidaSverige

This brochure was prepared by the civic organization “Dobrochyn Centre” within the framework of the project “Resilient Chernihiv Region: Recovery through Partnership”, which is part of the “Impulse” project.

The “Impulse” project is implemented by the International Renaissance Foundation and the East Europe Foundation with financial support from Norway (Norad) and Sweden (Sida).

The content of this publication does not necessarily reflect the views of the International Renaissance Foundation, the East Europe Foundation, the Government of Norway, or the Government of Sweden.
